March 6, 2024

PROJECTS

Health Insurance Management System for Assosa University

Language: HTML, CSS, and JS for Frontend, PHP for backend and MySQL database
Grade: A for documentation and A+ implementation. Responsibility: Group Leader

Robofriends

Developed a web application that allows users to search and interact with a dynamic list of robot profiles. The project was built using React, incorporating responsive design, API integration, and efficient state management. This practice project helped enhance my skills in React, API handling, and front-end development.
